Mindluster Platform

About the course Deploying Software to Kubernetes

You can create a Deployment using the kubectl apply , or kubectl create commands. Once created, the Deployment ensures that the desired number of Pods are running and available at all times. The Deployment automatically replaces Pods that fail or are evicted from their nodes.

Programming Category's Courses

Course Lesson(4)

Lesson 1 : **Deploying Software to Kubernetes The Course Overview|packtpub com**

Lesson 2 : **Deploying Software to Kubernetes Docker Swarm |packtpub com**

Lesson 3 : **Deploying Software to Kubernetes Test System |packtpub com**

Lesson 4 : **Deploying Software to Kubernetes Types of Monitoring |packtpub com**
