Mindluster Platform

About the course Serverless Microservices Architecture

Serverless microservices are cloud-based services that use serverless functions to perform highly specific roles within an application. Serverless functions, which execute small segments of code in response to events, are modular and easily scalable, making them well-suited for microservice-based architectures.

Programming Category's Courses

Course Lesson(7)

Lesson 1 :
Implementing Serverless Microservices Architecture Patterns The Course Overview |packtpub com

Lesson 2 :
Implementing Serverless Microservices Architecture Patterns Implement DB Per Service|packtpub com

Lesson 3 :
Implementing Serverless Microservices Architecture Patterns Rel vs Non Relational DB|packtpub com

Lesson 4 :
Implementing Serverless Microservices Architecture Patterns API API Compo Patterns|packtpub com

Lesson 5 :
Implementing Serverless Microservices Architecture Patterns Monitor Observal Pattern|packtpub com

Lesson 6 :
Implementing Serverless Microservices Architecture Patterns Continuous Integral|packtpub com

Lesson 7 :
Implementing Serverless Microservices Architecture Patterns When to Use Not Use|packtpub com
