Mindluster Platform

About the course RESTful Web Services with Spring 5

RESTful web services try to define services using the different concepts that are already present in HTTP. REST is an architectural approach, not a protocol. It does not define the standard message exchange format. We can build REST services with both XML and JSON. JSON is more popular format with REST.

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Building RESTful Web Services with Spring 5 The Course Overview|packtpub com**

Lesson 2 : **Building RESTful Web Services with Spring 5 Apache Maven|packtpub com**

Lesson 3 :
Building RESTful Web Services with Spring 5 Benefits of Reactive programming|packtpub com

Lesson 4 :
Building RESTful Web Services with Spring 5 Exploring File Structure Initializer|packtpub com

Lesson 5 :
Building RESTful Web Services with Spring 5 Mapping CRUD Operations to HTTP Methods|packtpub com

Lesson 6 :
Building RESTful Web Services with Spring 5 Building a REST Client and Error Handling|packtpub com
