Mindluster Platform

About the course Applications of Statistical with Python

Python's statistics is a built-in Python library for descriptive statistics. You can use it if your datasets are not too large or if you can't rely on importing other libraries. NumPy is a third-party library for numerical computing, optimized for working with single- and multi-dimensional arrays.

Programming Category's Courses

Course Lesson(4)

Lesson 1 : **Applications of Statistical Learning with Python The Course Overview |packtpub com**

Lesson 2 :
Applications of Statistical Learning with Python Diving into Computer Vision|packtpub com

Lesson 3 : **Applications of Statistical Learning with Python Filtering Spam|packtpub com**

Lesson 4 : **Applications of Statistical Learning with Python Learning to See Emotion|packtpub com**
