Mindluster Platform

About the course Advanced Computer Vision

The EdTech industry is another example of computer vision in artificial intelligence. This technology allows teachers to assess the learning process easily and non-obstructively compared to standard classroom education. Therefore, teachers can point out disengaged students and personalize the educational process .

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **Advanced Computer Vision Projects The Course Overview|packtpub com**

Lesson 2 : **Advanced Computer Vision Projects Steps to Read License Plates|packtpub com**

Lesson 3 :
Advanced Computer Vision Projects Pose Estimation with DeeperCut and ArtTrack|packtpub com
