Mindluster Platform

About the course Refactoring Python Code

Refactoring in Python. Refactoring is the technique of changing an application (either the code or the architecture) so that it behaves the same way on the outside, but internally has improved. These improvements can be stability, performance, or reduction in complexity.

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Refactoring Python Code The Course Overview|packtpub com**

Lesson 2 : **Refactoring Python Code Overview of Python Anti Patterns|packtpub com**

Lesson 3 : **Refactoring Python Code Refactoring Through Splitting Up Functions|packtpub com**

Lesson 4 :
Refactoring Python Code Assessing the Correct Class for Fields and Methods|packtpub com

Lesson 5 : **Refactoring Python Code Introduction to Pattern Based Refactoring|packtpub com**

Lesson 6 : **Refactoring Python Code Using Rope a Python Refactoring Library|packtpub com**
