Mindluster Platform

About the course Building Web Servers in Java

Java servlets are server-side Java programs that application servers can run to generate content in response to a client request. Servlets can be thought of as applets that run on the server side without a user interface. Servlets are invoked through URL invocation or by other servlets .

Programming Category's Courses

Course Lesson(2)

Lesson 1 : **Building Web Servers in Java The Course Overview | packtpub com**

Lesson 2 : **Building Web Servers in Java esigning a REST API â€“ Basic Principles | packtpub com**
