Mindluster Platform

About the course Functional Programming in Go

Functional programming is the process of building software by composing pure functions, avoiding shared state, mutable data, and side-effects. Functional programming is declarative rather than imperative, and application state flows through pure functions .

Programming Category's Courses

Course Lesson(8)

Lesson 1 : **Functional Programming in Go The Course Overview|packtpub com**

Lesson 2 : **Functional Programming in Go An Overview of HOF|packtpub com**

Lesson 3 : **Functional Programming in Go Overview of Function Literals|packtpub com**

Lesson 4 : **Functional Programming in Go Overview of Immutability|packtpub com**

Lesson 5 : **Functional Programming in Go Overview of Lazy and Eager Evaluation|packtpub com**

Lesson 6 :
Functional Programming in Go An Overview of Currying and Partial Functions|packtpub com

Lesson 7 : **Functional Programming in Go Popular Design Patterns|packtpub com**

Lesson 8 : **Functional Programming in Go Benefits of Testing FP Code|packtpub com**
