Mindluster Platform

About the course Hands On Big Data Processing with Hadoop 3

Hadoop stores and processes the data in a distributed manner across the cluster of commodity hardware. To store and process any data, the client submits the data and program to the Hadoop cluster. Hadoop HDFS stores the data, MapReduce processes the data stored in HDFS, and YARN divides the tasks and assigns resources.

Programming Category's Courses

Course Lesson(7)

Lesson 1 : **Hands On Big Data Processing with Hadoop 3 The Course Overview | packtpub com**

Lesson 2 :
Hands On Big Data Processing with Hadoop 3 The Rise of Resource Manager | packtpub com

Lesson 3 : **Hands On Big Data Processing with Hadoop 3 What Is MapReduce | packtpub com**

Lesson 4 :
Hands On Big Data Processing with Hadoop 3 Why We Need to Analyze Data with Hive | packtpub com

Lesson 5 :
Hands On Big Data Processing with Hadoop 3 How Are We Going to Learn | packtpub com

Lesson 6 : **Hands On Big Data Processing with Hadoop 3 What Is Flume | packtpub com**

Lesson 7 : **Hands On Big Data Processing with Hadoop 3 Pig Background | packtpub com**
