Mindluster Platform

About the course Building RESTful APIs with Go

REST is a style of software architecture that provides a convenient and consistent approach to requesting and modifying data. The term REST is short for "Representational State Transfer." In the context of Google APIs, it refers to using HTTP verbs to retrieve and modify representations of data stored by Google .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Building RESTful APIs with Go The Course Overview | packtpub com**

Lesson 2 : **Building RESTful APIs with Go Building an API Web Server | packtpub com**

Lesson 3 : **Building RESTful APIs with Go Outlining the API | packtpub com**

Lesson 4 : **Building RESTful APIs with Go Why Are Tests Important | packtpub com**

Lesson 5 : **Building RESTful APIs with Go Echo Framework | packtpub com**
