Mindluster Platform

About the course Troubleshooting Android Performance

Once developer settings are unlocked, head into the secret menu and scroll just over half way down the page where toggles related to animations are available. Unless you have tweaked them beforehand, each should be set to 1x. However, changing each to 0.5x should noticeably speed up the performance of your device .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Troubleshooting Android Performance The Course Overview|packtpub com**

Lesson 2 : **Troubleshooting Android Performance What Are Memory Leaks |packtpub com**

Lesson 3 :
Troubleshooting Android Performance Making Requests Asynchronous on Background Thread|packtpub com
