Mindluster Platform

About the course Architecting for High Availability on Azure

Planned outages are the primary reason to have high availability in the cloud. These outages are needed to take systems or data offline to facilitate maintenance tasks, such as the deployment of new hardware or software upgrades .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Architecting for High Availability on Azure The Course Overview | packtpub com**

Lesson 2 : **Architecting for High Availability on Azure Azure App Services | packtpub com**

Lesson 3 :
Architecting for High Availability on Azure Azure Storage and Database Services | packtpub com

Lesson 4 : **Architecting for High Availability on Azure Azure Network Services | packtpub com**

Lesson 5 :
Architecting for High Availability on Azure Monitoring Capabilities in Azure | packtpub com
