Mindluster Platform

About the course Managing Microservices in Practice

One way to deploy your microservices is to use the Multiple Service Instances per Host pattern. When using this pattern, you provision one or more physical or virtual hosts and run multiple service instances on each one. In many ways, this the traditional approach to application deployment .

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Managing Microservices in Practice The Course Overview | packtpub com**

Lesson 2 : **Managing Microservices in Practice Familiarize Yourself with kubectl | packtpub com**

Lesson 3 :
Managing Microservices in Practice Overview of Kubernetes Role Based Access Control | packtpub com

Lesson 4 :
Managing Microservices in Practice Ingress versus Service versus Service Mesh | packtpub com

Lesson 5 :
Managing Microservices in Practice Breakdown of CI and CD for Containers | packtpub com

Lesson 6 :
Managing Microservices in Practice Monitoring with Prometheus and Grafana | packtpub com
