Mindluster Platform

About the course Web Assembly

WebAssembly is a new type of code that can be run in modern web browsers â€” it is a low-level assembly-like language with a compact binary format that runs with near-native performance and provides languages such as C/C++, C# and Rust with a compilation target so that they can run on the web .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Intro to Rust Web Assembly with Rust s Wasm Bindgen Library**

Lesson 2 : **Rust Web Assembly Building a Simple Markdown Parser with Rust s Wasm Bindgen**

Lesson 3 : **Rust Web Assembly Using Stdweb to Build a Client side Application with Rust and WASM**

Lesson 4 : **Rust Web Assembly Building a Canvas Snake Game using Stdweb Part 1**

Lesson 5 : **Rust Web Assembly Building a Canvas Snake Game using Stdweb Part 2**
