Mindluster Platform

About the course PostgreSQL constraints

There is no ALTER command for constraints in Postgres. The easiest way to accomplish this is to drop the constraint and re-add it with the desired parameters. Of course any change of the constraint will be run against the current table data .

Programming Category's Courses

Course Lesson(7)

Lesson 1 :
PostgreSQL Tutorials | What is Constraint | Types of constraints in PostgreSQL | DBMS Constraints

Lesson 2 :
Postgresql Tutorials | Not Null Constraints in Postgresql | postgresql not null example|sql not null

Lesson 3 : **Postgresql Tutorials | Unique Constraints in Postgresql | psql unique constraints**

Lesson 4 :
Postgresql Tutorials | Primary Key Constraints in Postgresql | postgresql primary key errors

Lesson 5 :
PostgreSQL Tutorials | Foreign Key Constraints in Postgresql | primary and foreign key relationship

Lesson 6 : **PostgreSQL Tutorials | Check Constraints in Postgresql**

Lesson 7 : **Postgresql Tutorials | How to drop Constraints | postgresql drop constraints**
