Mindluster Platform

About the course Django React Full Stack Web App

We also established that when using React and Django together, React serves as the frontend (client-side framework), that handles the UI and getting & setting data via requests to the Django backend, which is an API built using the Django REST framework (DRF) .

Programming Category's Courses

Course Lesson(17)

Lesson 1 : **Django React Tutorial 1 Full Stack Web App With Python JavaScript**

Lesson 2 : **Django React Tutorial 2 Django REST Framework**

Lesson 3 : **Django React Tutorial 3 React Integration Using Webpack Babel**

Lesson 4 : **Django React Tutorial 4 React Router and Building Components**

Lesson 5 : **Django React Tutorial 5 Handling POST Requests Django REST**

Lesson 6 : **Django React Tutorial 6 Material UI Components**

Lesson 7 : **Django React Tutorial 7 Calling API Endpoints From React**

Lesson 8 : **Django React Tutorial 8 Creating The Room Join Page**

Lesson 9 : **Django React Tutorial 9 ComponentDidMount and Django Sessions**

Lesson 10 : **Django React Tutorial 10 Django Sessions and Leaving Rooms**

Lesson 11 : **Django React Tutorial 11 Updating Django Models**

Lesson 12 : **Django React Tutorial 12 React Default Props and Callbacks**

Lesson 13 : **Django React Tutorial 13 Spotify API Tutorial Authentication Tokens**

Lesson 14 : **Django React Tutorial 14 Using the Spotify API**

Lesson 15 : **Django React Tutorial 15 Pausing Playing Music With Spotify API**

Lesson 16 : **Django React Tutorial 16 Skipping Songs and Handling Votes**

Lesson 17 : **Django React Tutorial 17 Functional Components useState useEffect**
