About the course Processing and Communications

Digital signal processing (DSP) refers to various techniques for improving the accuracy and reliability of digital communications. The theory behind DSP is quite complex. Basically, DSP works by clarifying, or standardizing, the levels or states of a digital signal.

Technology Category's Courses

Course Lesson(5)

Lesson 1 : **Signal Smoothing**

Lesson 2 : **Performing Peak Analysis**

Lesson 3 : **Digital Filtering**

Lesson 4 : **Determining Signal Similarities**

Lesson 5 : **What Is DSP System Toolbox DSP System Toolbox Overview**
