Mindluster Platform

About the course Complete Python

One of the biggest reasons most beginners start with Python is its simpler syntax, making it less challenging to grasp. For instance, while writing the Hello World program in Java, it needs a code of around 3-4 lines for a single statement, while on the other end, in Python, the same can be done using just 1 line.

Programming Category's Courses

Course Lesson(41)

Lesson 1 : **Python Training for Beginners Install python**

Lesson 2 : **Python for Beginners Jupyter notebook tutorial**

Lesson 3 : **Python Training Beginners What is a Variable in Python**

Lesson 4 : **Python Training Python string slicing**

Lesson 5 : **Python Training for Beginners Learn Python String Methods**

Lesson 6 : **Python Training Python String Formatting**

Lesson 7 : **Python Training Course Python List Append Insert Remove**

Lesson 8 : **Python Training Python Lists Basics**

Lesson 9 : **Python Training for Beginners Learn Python Print Statement**

Lesson 10 : **Python Training Course Python Sort List**

Lesson 11 : **Python Training Course Python List Extend**

Lesson 12 : **Python Training Course Python Zip Function Python Tutorial with Examples**

Lesson 13 : **Python Training Course Python List Index**

Lesson 14 : **Complete Python Training Python List Length**

Lesson 15 : **Python Training Course Python List Count**

Lesson 16 : **Python Training How to use python list in method**

Lesson 17 : **Python Training List Slicing**

Lesson 18 : **Python Training Python List of Lists**

Lesson 19 : **Python How to check if a list is empty || Python Tutorial**

Lesson 20 : **Python Training Python Dictionary Basics**

Lesson 21 : **Python Training Dictionary get method Python**

Lesson 22 : **Python Training Dictionary Setdefault method Python**

Lesson 23 : **Python Training Nested Dictionary in Python**

Lesson 24 : **Python Training What are Tuples in Python**

Lesson 25 : **What is the Difference between a list and a tuple**

Lesson 26 : **Python if statement Flow Control in Python**

Lesson 27 : **Python Training Python for Loops**

Lesson 28 : **Python Enumerate**

Lesson 29 : **Why I like list comprehensions in python and why you should too**

Lesson 30 : **Dictionary Comprehension Python with Examples**

Lesson 31 : **Functions in Python The Basics**

Lesson 32 : **Lambda Functions Python Lambda Expressions Python**

Lesson 33 : **Python Training Python sets What are they How to understand sets in python**

Lesson 34 : **More on Lambda function sorted Python**

Lesson 35 : **Python Map Function**

Lesson 36 : **Python List Methods Sort Reverse Max and Min**

Lesson 37 : **How to Open and Read a File in Python**

Lesson 38 : **Python Regular Expressions**

Lesson 39 : **Watch this if you want to LEARN MATPLOTLIB for PYTHON**

Lesson 40 : **Circle Detection with OpenCV and Python**

Lesson 41 : **Robotics Why you should be learning it and how to do it**
