Mindluster Platform

About the course Operating Systems

An Operating System (OS) is an interface between a computer user and computer hardware. An operating system is a software which performs all the basic tasks like file management, memory management, process management, handling input and output, and controlling peripheral devices such as disk drives and printers.

Computer Science Category's Courses

Course Lesson(7)

Lesson 1 : **Segmented Paged and Virtual Memory**

Lesson 2 : **Variables and Parameters 1**

Lesson 3 : **Variables and Parameters 2**

Lesson 4 : **Processor Addressing Modes**

Lesson 5 : **Process Scheduling**

Lesson 6 : **The Call Stack**

Lesson 7 : **Roaming User Profiles**
