Mindluster Platform

About the course Data Science Overview

data science It is a multidisciplinary curriculum that is based on artificial intelligence, mathematics, statistics and computer engineering in order to analyze data, infer all that happened in the past, and predict what will happen

Computer Science Category's Courses

Course Lesson(20)

Lesson 1 : **Intro to Data Science Overview**

Lesson 2 : **Intro to Data Science Historical Context**

Lesson 3 : **Intro to Data Science What is Data Science**

Lesson 4 : **Intro to Data Science Answering Questions with Data**

Lesson 5 : **Intro to Data Science The Nature of Data**

Lesson 6 : **Machine Learning Overview**

Lesson 7 : **Machine Learning Goals**

Lesson 8 : **Machine Learning and Cross Validation**

Lesson 9 : **Types of Machine Learning 1**

Lesson 10 : **Types of Machine Learning 2**

Lesson 11 : **Artificial Intelligence**

Lesson 12 : **Neural Network Overview**

Lesson 13 : **Neural Network Architectures Deep Learning**

Lesson 14 : **Neural Networks and Deep Learning**

Lesson 15 : **Neural Networks Caveats**

Lesson 16 : **Digital Twins**

Lesson 17 : **Data Visualization Overview**

Lesson 18 : **Data Visualization Types of Data**

Lesson 19 : **Data Visualization Storytelling with Data**

Lesson 20 : **Data Visualization Buyer Beware**
