About the course Database Management System

A database management system (DBMS) is a software package designed to define, manipulate, retrieve and manage data in a database. A DBMS generally manipulates the data itself, the data format, field names, record structure and file structure. It also defines rules to validate and manipulate this data

Programming Category's Courses

Course Lesson(16)

Lesson 1 : **Introduction to Database Management Systems Definitions of Database Terminologies**

Lesson 2 : **introduction to Database Management System Meta Data and Data Modeling**

Lesson 3 :
Preparing for Your Database Professional Career and Introduction to Database Management System

Lesson 4 : **Data Modeling and Data Model Business Rules in Database Management System**

Lesson 5 :
Entity Relationship Model and Entity Relationship Diagram Database Management System

Lesson 6 : **Relational Database Model logical structure Database Management System**

Lesson 7 : **Type of Relationships within the Relational Database Management System**

Lesson 8 :
SQL Scripts for Relational DB Create Table Insert Values Select Query and Boolean Statements

Lesson 9 :
Entity Relationship ER Modeling ER Model is a Database Design Tool Database Management System

Lesson 10 :
How to Use MySQL Workbench Basic concepts how to run query create a database and table

Lesson 11 : **SQL Commands How to insert update and delete data**

Lesson 12 : **Database Management System SQL Scripts Overview**

Lesson 13 :
MySQL Database System How to retrieve datafrom a single table SELECT ORDER BY WHERE statements

Lesson 14 : **MySQL Statements Assignments using HAVING and GROUP BY Clauses**

Lesson 15 : **MySQL Workbench Assignment Select statement with Join Query 2 or more tables**

Lesson 16 : **MySQL Workbench How to code subqueries using SQL scripts**
