About the course Oracle Linux Fundamentals

Oracle Linux course, in this course Explore the essentials of Oracle's enterprise-grade Linux operating system in this comprehensive course.

Computer Science Category's Courses

Course Lesson(17)

Lesson 1 : **VMWare configuration || Sharing a folder or Drive from windows machine to VM**

Lesson 2 : **Oracle Linux 7 | Oracle Linux 8 Software download from Oracle edelivery**

Lesson 3 : **Oracle Linux 5 Installation || OEL5 8**

Lesson 4 : **Oracle Linux 6 Installation || OEL 6 5**

Lesson 5 : **Oracle Linux 7 Installation || OEL 7 8**

Lesson 6 : **Oracle Linux 8 Installation || OEL 8 2**

Lesson 7 : **01 Oracle Virtual Box Setup Configuration with Software download GI Database OEL**

Lesson 8 :
02 OEL 5 Installation with Custom Partition | Guest Additional Installation and etc hosts Config

Lesson 9 :
03 OEL 6 Installation with Custom Partition | Guest Additional Installation and etc hosts Config

Lesson 10 :
04 OEL 7 Installation with Custom Partition | Guest Additional Installation and etc hosts Config

Lesson 11 :
05 OEL 8 Installation with Custom Partition | Guest Additional Installation and etc hosts Config

Lesson 12 :
06 Creating OS Groups OS User grid oracle || Creating GI and DB Home Directories OEL6

Lesson 13 :
07 DNS Named Bind Server Configuration NTP nslookup Forward Revers Zone Firewall OEL6

Lesson 14 :
Shell Script Size Estimation How much mount point size needed for unzipping a patch zip file

Lesson 15 :
Oracle OEL 7 9 Installation Configuration VirtualBox || Post Installation Steps || YUM repo

Lesson 16 :
Installation of Oracle Virtual Box Software Installation of Oracle Linux Post N W Configuration

Lesson 17 :
Installation of Oracle Linux Server from Ready Machines How to get Ready VMs for Practice
