About the course Variable in Java Programming

Variable in Java course, in this course Understand variable types, declaration, scope, and usage in Java programming for data storage and manipulation.

Computer Science Category's Courses

Course Lesson(24)

Lesson 1 : **Java Basics An Overview**

Lesson 2 : **Introduction to Variables in Java**

Lesson 3 : **Variables in Java Practice**

Lesson 4 : **Constants in Java**

Lesson 5 : **Identifiers in Java**

Lesson 6 : **Introduction to Data Types in Java**

Lesson 7 : **The int Data Type in Java**

Lesson 8 : **The byte short and long Data Types in Java**

Lesson 9 : **Integers Data Types in Java Practice**

Lesson 10 : **Bytes and Values in Java**

Lesson 11 : **The double and float Data Types in Java**

Lesson 12 : **The char Data Type in Java**

Lesson 13 : **The boolean Data Type in Java**

Lesson 14 : **The String Data Type in Java**

Lesson 15 : **Calling String Methods in Java**

Lesson 16 : **Concatenating Strings in Java**

Lesson 17 : **Primitive Types and Reference Types in Java**

Lesson 18 : **Instantiating a String Object**

Lesson 19 : **Strings are Immutable in Java**

Lesson 20 : **The Scanner Class in Java**

Lesson 21 : **Reading Input From the Keyboard in Java**

Lesson 22 : **Java Exercise â€“ Favorite Number**

Lesson 23 : **Java Exercise â€“ Name and Age**
