About the course Process Management in Operating System

Process Management course, In this course you'll delve into the principles and techniques of efficiently managing computer processes.

Computer Science Category's Courses

Course Lesson(15)

Lesson 1 : **Process Management Processes and Threads**

Lesson 2 : **Process State**

Lesson 3 : **Process Control Block**

Lesson 4 : **Process Scheduling**

Lesson 5 : **Context Switch**

Lesson 6 : **Operation on Processes â€“ Process Creation**

Lesson 7 : **Operation on Processes â€“ Process Termination**

Lesson 8 : **Interprocess Communication**

Lesson 9 : **Shared Memory Systems**

Lesson 10 : **Message Passing Systems Part 1**

Lesson 11 : **Message Passing Systems Part 2**

Lesson 12 : **Message Passing Systems Part 3**

Lesson 13 : **Sockets in Operating System**

Lesson 14 : **Remote Procedure Calls RPC**

Lesson 15 : **Issues in RPC How They re Resolved**
