Mindluster Platform

About the course Chemical Engineering Laboratory

Chemical Engineering Laboratory course, in this course, explore practical aspects of chemical processes, experiments, and hands-on skills in this essential course.

Engineering Category's Courses

Course Lesson(15)

Lesson 1 : **Introduction to Chemical Engineer Syllabus E01**

Lesson 2 : **Physical Chemistry Equilibrium Thermodynamics E011**

Lesson 3 : **Transport Phenomena in Engineering E12**

Lesson 4 : **Unit Operations in Chemical Engineering E13**

Lesson 5 : **Momentum Transport Unit Operations E14**

Lesson 6 : **Heat Transfer Unit Operations in Chemical Engineering E15**

Lesson 7 : **Mass Transfer Operations and Separation Processes E16**

Lesson 8 : **Kinetic and Reactor Engineering E17**

Lesson 9 : **Unit Operations Laboratory E18**

Lesson 10 : **Overview of Design Operation of Chemical Plants E19**

Lesson 11 : **Process Control Automation in Chemical Engineering E20**

Lesson 12 : **Computer Aided Simulation Design in Chemical Engineering E21**

Lesson 13 : **Process Design Operation Introduction E22**

Lesson 14 : **Chemical Plant Financing Economics E23**

Lesson 15 : **Conclusion of the Chemical Engineer Syllabus E24**
