Mindluster Platform

About the course Field development operations

Field development course, In this course we will delve into the strategies and techniques involved in comprehensive field development planning and execution.

Engineering Category's Courses

Course Lesson(5)

Lesson 1 : **Field production modes flow equilibrium**

Lesson 2 : **Dry gas field performance production profile computation subsea layout**

Lesson 3 : **Field development cash flow calculations flow assurance considerations subsea systems**

Lesson 4 : **Hydrocarbon surface and downhole networks probabilistic reserve estimation**

Lesson 5 : **Probability tree field development process and offshore structures**
